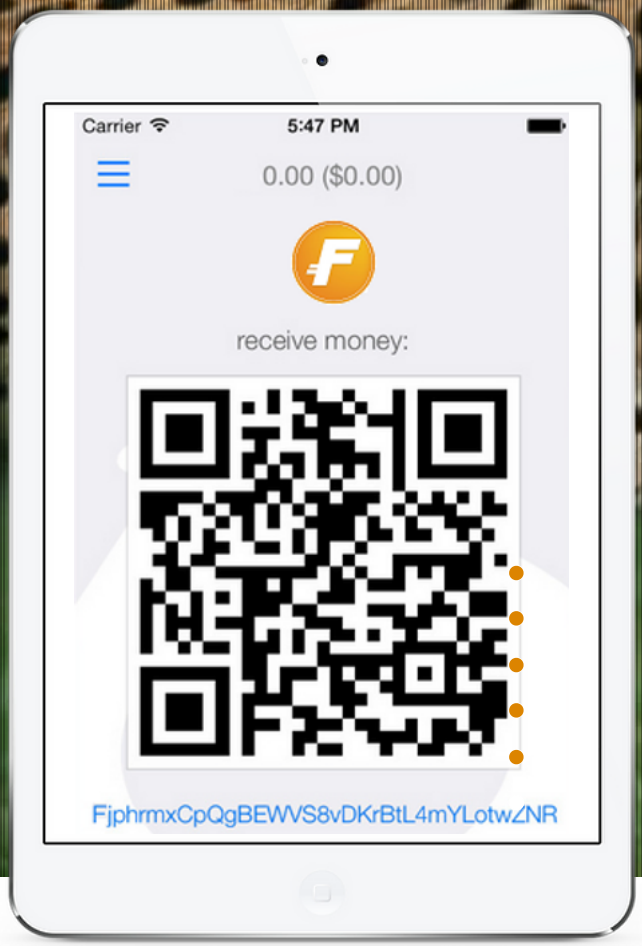
Near Instant Transactions



HOW IT WORKS

01

FAST

02

EASY

03

SECURE

Let's Chat!

With near instant Block times, FastCoin is the fastest stable released Peer-to-Peer Cryptocurrency. Speed of transactions is native to the coin and directly integrated into the coin's BlockChain.

Wallets are easily downloadable and users of the coin who would like to learn more are encouraged to join our forum at fastcointalk.org

With over 7 years of proven operation, FastCoin also has the deepest BlockChain of any Cryptocurrency, making it one of the most secure.

Who We Are

OUR STORY

We are a global team of FastCoin enthusiasts that seek to make Cryptocurrency technology practical and easy to use.

OUR VISION

We support the FastCoin Open source community and believe open fast payments should be available to all that wish to use it.

TECHNOLOGY

Near instant Block times allow for fast and secure transactions to take place natively on the BlockChain. No need to add additional levels of code over-top the BlockChain, thus maintaining its security and ease of use.

Developer Resources

- What is FastCoin? Read our FAQ
- Source code on GitHub
