## WHAT IS INFINITECOIN?

Infinitecoin is a peer-to-peer Internet currency that enables instant, near-zero cost payments to anyone in the world. Infinitecoin is an open source, global payment network that is fully decentralized without any central authorities. Mathematics secures the network and empowers individuals to control their own finances. Infinitecoin features faster transaction confirmation times and improved storage efficiency than the leading math-based currency. With substantial industry support, trade volume and liquidity, Infinitecoin is a proven medium of commerce complementary to Bitcoin.

## Open Source Software

Infinitecoin is an open source software project released under the MIT/X11 license which gives you the power to run, modify, and copy the software and to distribute, at your option, modified copies of the software. The software is released in a transparent process that allows for independent verification of binaries and their corresponding source code.

## Blockchain

The Infinitecoin blockchain is capable of handling higher transaction volume than its counterpart - Bitcoin. Due to more frequent block generation, the network supports more transactions without a need to modify the software in the future.

As a result, merchants get faster confirmation times, while still having ability to wait for more confirmations when selling bigger ticket items.

---

## Wallet Encryption

Wallet encryption allows you to secure your wallet, so that you can view transactions and your account balance, but are required to enter your password before spending infinitecoins.

This provides protection from wallet-stealing viruses and trojans as well as a sanity check before sending payments.

## Mining Reward

From September 22, 2022, Infinitecoin has activated a new consensus. Each block rewards 1000 IFC and will never be halved. You are welcome to become a miner to maintain the healthy operation of the Infinitecoin blockchain.

### About infinitecoin.com

Infinitecoin.com is dedicated to help Infinitecoin to develop in a sustainable way.  
Infinitecoin.com is not Infinitecoin's official website. Just like nobody owns the email technology, nobody owns the Infinitecoin network.  
As such, nobody can speak with authority in the name of Infinitecoin.
