Spots is a cryptocurrency established to support trade between digital currency and precious metals. A gold / silver spot is the trading price of the metal; hence the name.

Spots Wallet v2.0 is a significant upgrade to the popular Spots cryptocurrency. The new wallet offers enhanced functionality; with several new features outlined below. The most important feature isn't a part of the program. It's a focus on building a community! We need you to get involved and make a difference! Thanks Testing Crypto for volunteering to redesign the OP & hope to see the rest of the community join in, helping out where they can!

It is actually the Spots coin, not Sports. The long term development plan for this coin is to build an exchange and / or market place in which the crypto currency is exchanged for precious metals. The trading price of precious metals is commonly referred to as the Spot, hence the name.

Launching Spots 2.0 isn't actually the beginning of this coin's development plan. It is a *long awaited* milestone in the evolution of this specific coin. The other goals are listed in the OP, and are mostly going to be introduced in the short term. The most important being the development of a community.

Mike

Your wish has been granted, this is not another Sport coin... I have updated the OP to be a little clearer, since people's eyes are playing tricks on them! 😊

I'd been interested in getting the Spots I bought released to me by Coins-E, it's been months now.

Once people are on the new client and the hardfork happens hopefully they will get it sorted.

CoinPayments - The original multi-cryptocurrency payment processor.

Hi again everyone -

I am pleased to announce that the OP has been updated with the Windows Qt
installer. Now everyone on Windows and Linux should be migrating to v2.0.1.

Please note that the client has two bugs, which I am working on... However,
the core functionality works fine and this will ensure you are on the right block
chain when we fork. 1) If you change a setting the client crashes (I believe
your change is saved though) 2) When closing the client an error is thrown.
Both are simply nuisance items that will be resolved ASAP.

Also, I am offering a 500 SPT bounty for a functional Mac Qt. Please PM me if
you are able to compile a Mac Qt for our community. Thanks!

I have reached out to them via Twitter. No contact email was available on their
site. If anyone else knows how to get a hold of them please pm me. 🙂

I forgot to put in the OP we have a Twitter handle "the_spt"
https://twitter.com/the_spt. I have updated the OP accordingly.

Please follow our community page, and re-tweet the announcements about
the fork! We need to get the word out that Spots is being overhauled!

Thanks!

Thanks again to *MrData* for saving the day! All issues with our previous
windows executable have been resolved, and it is even buttoned up in a nice
installer that converts your wallet.dat file to the new client.

Please note: You must exit out of the Spots v1 client before upgrading to v2.

Midnight GMT - Upgrade Now**   #16
May 21, 2014, 08:45:48 AM

AmericanComputerNerd, make rar/7z/zip just with needed files (really
there is nothing to install...). Some people, like me, installs only software that
cannot run without real installation (lot of registry data/lot of different paths
in many directories in system).

I've included both on our Sourceforge.net page, the link points to both files to
give greater flexibility to our community. Thanks for the suggestion. 🙂

**Re: [ANN][SPT][SPOTS2] - Spots to Spots2 Hard Fork June 1
Midnight GMT - Upgrade Now**   #19
May 22, 2014, 06:57:47 AM

Hello Team Spots2!

Today was focused on spreading the news and trying to get the word out that
clients need to be upgraded ASAP. Here's what was done...

- Increased the visibility of our Twitter feed by following several related feeds.
 I've also linked accounts to our Twitter feed, where possible.
- There was an old Spots ANN thread on CryptocoinTalk.com, I've notified
those followers of the upcoming fork.
- I've posted a new ANN thread on CrpytocoinTalk.com to replace the old one.
-- https://cryptocointalk.com/topic/11536-annsptspots2-spots-to-spots2-
hard-fork-june-1-midnight-gmt-upgrade-now/
- CoinPayments.net has created a page showing all merchants accepting SPT
as a form of payment. Adding to OP.
-- https://www.coinpayments.net/store-directory-coin-SPT

In Progress:
- Fork details have been provided to AltCoinCalendar.info to be listed on their
calendar. [pending admin approval]
- We've been in contact with CoinMarketCap.com's admin and have provided
him with the necessary API to be listed. I am hopeful we'll be listed on their
site within a few days.

CoinPayments

**Re: [ANN][SPT][SPOTS2] - Spots to Spots2 Hard Fork June 1
Midnight GMT - Upgrade Now**   #20
May 22, 2014, 02:48:37 PM

On that CoinPayments page it just shows the merchants who have asked to be
in the store directory, in total around 175 merchants have Spots enabled 😊

CoinPayments - The original multi-cryptocurrency payment processor.
